BFR - It's Back!

It's pouring in the Taproom now and it tastes out of this world!

Once upon a time in a brewery not so far away, the Hop Rocket was launched to commemorate the 50th anniversary of the Apollo 11 mission to the Moon. Three years later, we watched in awe the development of the SpaceX Starship designed to go the the Moon, Mars, Infinity and Beyond.

The original code name for this super heavy rocket was the BFR...

We have always admired the hoppy IPAs constructed on a malt driven backbone, brewed by Odell Brewing in Fort Collins, Colorado. In tribute to this style we scaled up our Hop Rocket to an IPA with a super charged payload of fruity, citrus driven hops.

This is the Hop Rocket BFR - Bitter, Fruity and Resinous?

It's
back!
